We are still receiving complaints when card holders do not follow the correct procedure at Mobil pre-pay pumps and their card is locked out as a result.

Pay at Pump will cancel the pay at pump transaction if the card holder lifts the nozzle and returns it to the bowser with-out fuelling

The pump will cancel the transaction if the nozzle is not lift-ed within 3 minutes

Once a transaction has been cancelled there is an auto-matic stand down period of 10 minutes regardless if you try another terminal or attempt to use your card in store. The service station has no control over this.

Cardholders should ensure that they pick up the correct nozzle for the grade required
